

Tyler County Building Permit Guidelines

Building Permit Requirements differ depending on which part of Tyler County your building will be constructed.

This determination also pertains to the installation of Solar Panels or other permanent structures.

Based on your location, please contact:

Tyler County: (This is any place outside the Woodville City Limits...that would include, Chester, Colmesneil, Doucette, Warren, Hillister, Spurger and Fred) These cities do not require any type of building permits for construction or the installation of Solar Panels or other permanent structures, as long as they have existing electrical and water service. Although, you may need to have the homeowner check with their Power Company, SHECO or ENTERGY, to make sure that their existing service can handle any new equipment that is to be installed.

City of Woodville: Call (409)283-2234 They require that their Building Code Officer do an inspection prior to any Construction on your site, or installation of Solar Panels to your structure or property.

City of Ivanhoe: Call (409)283-3299 You must get an Electrical Permit from them, at Ivanhoe City Hall. Then, they require that your electrical service provider sign their permit, verifying that the residence meets the Electric Service provider requirements for both Construction and Solar Panel installation.

Wildwood/Village Mills: Call (409)834-2241 to verify their requirements for Construction or Equipment installation.

PLEASE NOTE: If for ANY reason, including non-payment, the electrical box of a residence is disconnected, a NEW electrical permit is required, no matter where you live in the county. This permit is gotten from the Emergency Management Office, located at 201 Veterans Way, Woodville, Texas 75959.
